

PUTTING GREEN

Congratulations on your sand-filled putting green upgrade! Whether you've just had it installed or are considering one, we're here to guide you on proper maintenance. Artificial turf offers a lush, low-maintenance alternative to traditional grass, but even putting greens require some care. With just three simple steps, you can ensure your synthetic green stays in top shape. No need to worry about the complexities of real grass maintenance, such as sunlight, water, and mowing. Enjoy year-round golfing on your low-maintenance, always-ready artificial putting green

STANDARD MAINTENANCE

Maintaining a putting green is similar to general turf care:

- * Regularly remove debris like leaves and twigs
- * Rinse dusty surfaces in dry weather
- * Use a stiff-bristle broom or power brush to maintain shape.
- * Inspect for minor issues and address them promptly
- * Contact professionals for small repairs
- * Address minor damage promptly
- * Follow recommended maintenance and cleaning instructions
- * Don't place heavy equipment or vehicles on it
- * Clean up pet waste promptly and thoroughly
- * Avoid using wire brushes, sharp objects, or high-pressure sprays exceeding 1,000psi
- * Avoid smoking, fireworks, and hot objects near the turf

These simple steps save time and ensure your green stays in top condition for practice and play

MAINTENANCE TIPS

Cleaning an artificial turf putting green may seem easy, but it's a task that requires careful attention. If done haphazardly, it can lead to damage, whether it's real or synthetic grass. Proper cleaning extends the lifespan of your artificial grass putting green.

- * Opt for plastic brushes or rakes to safeguard your artificial turf
- * Regularly examine the infill material to maintain the quality of your grass
- * Maintain a distance of 8-10 feet between the hose and the turf to prevent potential damage
- * Proper cleaning is crucial for the longevity of your artificial grass putting green, regardless of the grass type. Done correctly, it ensures a prolonged lifespan
